Professional Summary

Professional Summary
Aspiring Cloud Engineer with hands-on experience in Amazon Web Services (AWS), including EC2, S3, IAM, VPC, CloudWatch, and SNS. Familiar with cloud infrastructure, networking, server deployment, monitoring, and access management. Experienced in building practical AWS projects and cloud-based solutions, with a strong interest in cloud computing, automation, and DevOps. Eager to apply technical knowledge and problem-solving skills in an entry-level Cloud Engineer role.

Education

B.Tech Information Technology, *EGS Pillay Engineering College* 2022 – 2026
CGPA: 8.5

HSC, *Municipal Girls Hr.Sec School* 2020 – 2022
Score: 72%

SSLC, *Municipal Girls Hr.Sec School* 2019 – 2020
Score: 66%

Technical Skills

Programming Languages
Java, C

Web Technologies
HTML5, CSS3, JavaScript, React.js, Responsive Web Design

Databases
SQL, MySQL, MongoDB

Tools & Technologies
Git, GitHub, VS Code, Android Studio

Soft Skills
Problem Solving, Adaptability, Teamwork, Communication

Core Java
OOP, Exception Handling, Basic DSA

Backend
Node.js, Express.js, RESTful APIs

Mobile Development
Android Studio, XML, Firebase, Google Maps API

Design
Figma, Canva

Certifications & Training

AWS Cloud Quest: Cloud Practitioner and Generative AI Practitioner
Amazon Web Services

Projects

Campus Bus Tracker (Android App),
Java, Android Studio, XML, Firebase, Google Maps API

- Developed a real-time college bus tracking application enabling students to view live bus locations and search available buses.

- Implemented Firebase Authentication, Realtime Database, Google Maps integration, and FCM-based arrival/delay notifications.
- Built student and admin modules for secure access, bus management, location updates, and transport announcements.

Application Load Balancer (ALB) Implementation on AWS | Cloud Computing,
AWS EC2, Application Load Balancer (ALB), Target Groups, Security Groups, Availability Zones

- Implemented an AWS Application Load Balancer to distribute incoming HTTP traffic across three Amazon EC2 instances.
- Configured target groups, health checks, listeners, and security groups to manage and route application traffic.
- Explored Availability Zone configuration to understand high availability and fault tolerance.
- Gained hands-on experience with AWS load balancing, traffic distribution, and scalable web application architecture.

Secure Static Website Hosting Using Amazon S3 | Cloud Computing,
Amazon S3, AWS IAM, Bucket Policies, Cloud Storage

- Hosted a static website on Amazon S3 by creating a bucket and uploading website files.
- Configured bucket policies, IAM permissions, and access controls to manage resource access.
- Explored public and private access settings and AWS security best practices.
- Learned S3 storage, static website hosting, and usage-based cloud pricing.
